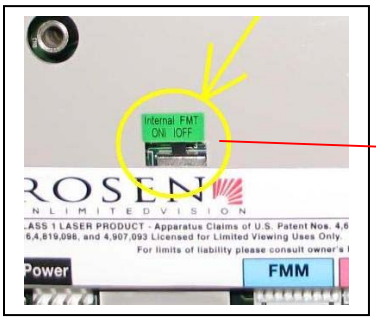
Reference: **Rosen: G8 Internal FM Modulator.**

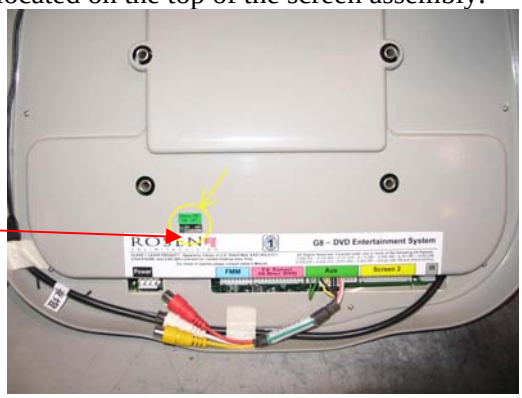
Subject: **Internal FM Modulator Activation Procedure**

Please note that the Rosen G8 overhead screen is shipped with a built-in adjustable internal FM modulator. This Fm modulator requires to be activated at installation time. Following is the procedure to activate the internal FM modulator and to select the frequency to transmit.

Step #1

Turn on the internal FM modulator by using the switch located on the top of the screen assembly.





Step #2

Power-up the video screen. **DO NOT INSERT A DVD in the DVD player**. When the Rosen entry Splash Screen appears (see picture #1) use the wireless remote control to access in the installer setup menu.

Step #5

Now go back to the Rosen entry Splash screen (see picture #1). Press the speaker button (see picture #2 press button 4) on the wireless remote control to select the FM modulator frequency that you want to use.(see picture #5) Use the right or left arrows on the wireless remote control (see picture #2 press button 5 or 6) to change the frequency of the internal FM modulator. (see picture #5)

Picture #5

Step #6

You can now use your new Rosen G8 screen.
